
Premium Series H.264 DVR

User's Manual

(Model: HDF1212DV, HDF1212H, HDE2424DV, HDE2424H,
HDS4848DV, HDS4848H)

- H.264 Stand-Alone DVR
- Superior Video Quality
- S-ATA Hard Disc Drive
- USB Mouse & Backup
- Advanced Network Features

Version : 10.11.03

Preface

We welcome you as a new user of the world's best digital video recorder (DVR), and the leading Digital Video Surveillance System. For effective usage, please read this manual carefully. For future reference, please keep this manual close to hand.

Copyright/Authentication/Trademark/Limited Warranty

Copyright

This manual is produced under copyright law. None of its contents may be copied or duplicated without prior approval.

Copyright 2009~

Authentication

Trademark

Ethernet(TM) is the trademark of Xerox Corporation.

Microsoft(TM), MS-DOS(TM), Windows(TM logo), Windows(TM) and Windows NT(TM) are the trademarks of Microsoft Corporation, used in the United States and elsewhere.

Limited Warranty

- The manufacturer, importer and agent shall not be responsible for accidental damage (including injury) and other damage caused by inappropriate use or operation of this product.
- The information in this manual is prepared based on the current specifications for the product. The manufacturer is currently adding new functions and will continue to upgrade the product with new technology. All specifications may be changed without notice to individual users.

Cautions

We strongly recommend that users read all safety cautions carefully before operating the product, to operate the product appropriately.

Since the indicated cautions contain critical safety information, they must be fully complied with. The cautions are categorized into Danger, Warning, Caution and Important.

 Danger	Risk of death or serious injury. This is the highest priority danger warning.
 Warning	Risk of serious or lesser degree of injury. May also cause damage to the product or to property.
 Caution	Risk of minor injury or damage.
 Important	Requirements or limitations regarding operation. Users are recommended to read the relevant details carefully so as to operate the product properly and without harm.

The above cautions indicate the degree of damage that may occur due to inappropriate use of the system.

Risk of death or serious injury.
This is the highest priority danger warning.

- RISK OF EXPLOSION IF BATTERY IS REPLACED BY INCORRECT TYPE. DISPOSE OF USED BATTERY ACCORDING TO THE INSTRUCTIONS.
- THIS EQUIPMENT IS INDOOR USE AND ALL THE COMMUNICATION WIRINGS ARE LIMITED TO INSIDE OF THE BUILDING.
- Please connect the power cord only to the type of AC outlet indicated in the manual or product specification. If connected to other types of power outlet, fire and electric shock may result.
- Do not expose the product to moisture and dampness. Doing so may result in fire and electric shock.
- Do not place heavy objects on top of the power cord. Damage to the power cord may result in fire and electric shock.
- Do not place containers with liquid or small metal objects on top of the product. Liquid or small metal objects getting into the unit may lead to fire and electric shock.
- Do not score, bend, twist, pull or heat the power cord. Damage to the power cord may lead to fire and electric shock.
- Do not remove the top casing of the product. Doing so may result in electric shock. If internal examination and maintenance are deemed necessary, contact the authorized system vendors or installers.
- Do not modify the product in any way. Doing so may lead to fire and electric shock.
- In case of lightning, immediately turn off the power switch and remove the power cord from the power outlet. Failure to do so may result in fire and electric shock.
- Please use only the power cord supplied with the product. Use of other power cords may result in fire and electric shock.
- In case of smoke, smell or noise, immediately turn off the power switch and remove the power cord from the power outlet. Continued operation of the product may result in fire and electric shock. Request a maintenance service from the authorized system vendors or installers.
- If the product is dropped or damaged, turn off the power switch and remove the power cord from the power outlet. Continued operation of the product may result in fire and electric shock. Users should request a maintenance service from the authorized system vendors or installers.
- Do not touch the product with wet hands. Doing so may result in electric shock.

Risk of serious or lesser degree of injury.
May also cause damage to the product or to property.

- Do not leave the power cord or other cables in passageways. Passers-by may trip and fall.
- Avoid contact with water or beverages. Contact with water or beverages may result in damage that cannot be repaired.
- In case of lightning, immediately turn off the power switch and remove the power cord from the power outlet. The product may otherwise be damaged.
- Excessive current from the product and the camera may result in an electric shock. Connect the power cord to an external device only when the products themselves are disconnected from their power supply.

Risk of minor injury or damage.

- If a foreign substance is stuck to the product, remove it using a soft cloth or tissue. Do not use chemical agents (thinner, solvent, etc.) to remove the substance.
- Do not operate or store the product in the following places.
 - An area that is either too cold or too hot
 - An area of high humidity, or in front of an air-conditioner, or in places subject to sudden temperature changes
 - An area where there is excessive dust
 - Areas where heat from the product cannot be emitted through both of the product's side ventilation openings
- Do not place credit cards/telephone cards/bank account books/tickets and other objects with magnetic properties near the product.
- Static electricity may cause damage to the internal parts of the product. Please remove static electricity from your body before touching the rear panel and internal electronic parts of the product.
- If this product is damaged beyond repair or reaches its maximum service life, dispose of it in compliance with local laws and regulations regarding the disposal of lead and plastic waste.

Important

Requirements or limitations regarding operation. Users are recommended to read the relevant details carefully so as to operate the product properly and without harm.

- The product may not work properly if the power source is unstable or and if electric shock occurs. Make sure the correct rated power is available.
- The product is designed to be proof against electric power failures; however, damage may occur as a result of power failure. Current data may be damaged or data might not be recorded. Make sure to use an Uninterruptible Power Supply (UPS).
- Since the product is designed to record video data on the hard disk, an error in the hard disk or other miscellaneous errors might prevent the product from recording properly. Periodic maintenance is required for proper operation of the product.
- The product is designed for users to configure their own interface. However a user configuration error could lead to operation malfunction. This product should be set up by certified installers only.
- Since the product is connected - and tightly coupled - to exterior accessories (camera, sensor, LAN, Hard Disk, etc.), there is a risk of malfunction from external causes. Ensure periodic maintenance by the certified installers.
- Use the rack mounting handle provided with the product for installation.
- In this product, 1 Kbyte equals 1,024 bytes, 1 Mbyte equals 1,024,000 bytes and 1 Gbyte equals 1,024,000,000 bytes.

Chapter 1. Introduction

1. The System

This product is the one that you are looking for quite long time. Eventually, The DVR which is high performance real time DVR based on H.264, you can enjoy the full benefit of latest compression H.264 and be free from headache because of stability of the DVR.

This product can distinguish the recorded data clearly compare to MPEG4 due to the motion artifact and will find the tremendous difference. It's your turn to enjoy the true solution for Digital Video Recorder with brand new product.

2. General Features

- True H.264 Standard Video Compression
- Embedded Linux System to give you the Ultimate Reliability
- Dedicated DB Structure for Stability
- Various Recording Resolution D1/Half D1/CIF
- CMS (Central Monitoring System)
- Easy Setup same like DVR GUI in CMS
- Web Monitoring, Searching and Setup
- Own Media Player for Backup Playback
- Four USB Port for Mouse operation, Multi USB Hub and Backup (Two USB Port in 4Ch.DVR)
- Up to Four SATA HDD and No Limitation of Capacity (Up to Two SATA HDD in 4Ch.DVR)
- Two- Way Audio
- Multiple DVRs can be operated with One Keyboard Controller
- Text-In & Relay Output Support
- Real Time Recording and Multi Ch. Playback
- 8/16 Audio Input (4 Mic Input) support (4 Line-In in 4Ch.DVR)
- Archiving Function to Secure the High Stability for Recorded Data
- 4 Spot Output with Event Pop up Function (1 Spot Output in 4Ch.DVR)

3. Specification

Model		4 Channel Premium DVR
Video	In	4 BNC
	Out	1VGA,& 1 BNC Main, 1 Spot Output
Audio	In	4 RCA (Line-In)
	Out	1 RCA (Line-Out)
Device	Sensor In	4 TTL
	Alarm Out	2 Relay + 2 TTL
	I/O Interface	RS232, RS485, USB2.0 x 1, USB1.1 x 1 for Mouse
Display	Speed	Real Time
	Resolution	720 x 480 (NTSC), 720 x 576 (PAL)
	Split Screen	1, 4, PIP, Digital Zoom
Recording	Compression	H.264 Codec
	Speed / Resolution	120fps@CIF(NTSC), 100fps@CIF(PAL) 60fps@Half D1(NTSC), 50fps@Half D1(PAL) 30fps@D1(NTSC), 25fps@D1(PAL)
	Picture Quality	Very High, High, Standard, Low
	Mode	Time-lapse, Event, Time & Event, Emergency (Panic)
Playback	Display	1, 4, Digital Zoom
	Search Mode	Calendar Search, Event Search, Text-In Search, Go to Time
	Playback Mode	Multi Channel Normal & Reverse Play, RW & FF (x2, x4, x8, x16, x32), Frame to Frame, Pause
Network	Interface	Ethernet (10/100 Base)
	Protocol	TCP/IP, HTTP, DHCP
	Application	Live, Playback, Setup, Notification (Callback, E-Mail)
	Web Browse	Internet Explorer 7 or higher
Storage		1xSATA HDD & 1xSATA ODD (or max. 2 SATA HDD w/o ODD)
Backup		CD & DVD-RW(Only HDF1212DV), External HDD(USB), External USB Memory
Control		Front Panel Button, USB Mouse, IR Remote Controller, Joystick Controller
OSD		Graphic User Interface (Multilingual)
Approval		FCC, CE, KCC
ROHS		ROHS Compliance
Power Consumption		DC12V, 3.33A (40W)
Operating Temperature		5°C ~ 40°C / 41°F~104°F
Operating Humidity		0%~80% / non-condensing
Dimension		340(W)x67(H)x265(D)mm / 13.39(W)x2.64(H)x10.43(D)inch
Weight		2Kg / 4.4lb (without ODD, HDD)

Model		8 Channel Premium DVR	16 Channel Premium DVR
Video	In	8 BNC	16 BNC
	Out	1VGA,& 1 BNC Main, 4 Spot Output	
Audio	In	8 RCA (4 Mic in, 4 Line in)	16 RCA(4 Mic in,12 Line in)
	Out	1 RCA (Line Out)	
Device	Sensor In	8 TTL	16 TTL
	Alarm Out	4 Relay + 4 TTL	4 Relay + 12 TTL
	I/O Interface	RS232, RS485, USB2.0 x 3, USB1.1 x 1 for Mouse	
Display	Speed	Real Time	
	Resolution	720 x 480 (NTSC), 720 x 576 (PAL)	
	Split Screen	1,4,9,PIP,Digital Zoom	1,4,9,13,16,PIP,Digital Zoom
Recording	Compression	H.264 Codec	
	Speed / Resolution	240fps@CIF(NTSC) 200fps@CIF(PAL) 120fps@Half D1(NTSC) 100fps@Half D1(PAL) 60fps@D1(NTSC) 50fps@D1(PAL)	480fps@CIF(NTSC) 400fps@CIF(PAL) 240fps@Half D1(NTSC) 200fps@Half D1(PAL) 120fps@D1(NTSC) 100fps@D1(PAL)
	Picture Quality	Very High, High, Standard, Low	
	Mode	Time-lapse, Event, Time & Event, Emergency (Panic)	
Playback	Display	1, 4, 9, Digital Zoom	1,4,9,13,16,Digital Zoom
	Search Mode	Calendar Search, Event Search, Text-In Search, Go to Time	
	Playback Mode	Multi Channel Normal & Reverse Play, RW & FF (x2, x4, x8, x16, x32), Frame to Frame, Pause	
Network	Interface	Ethernet (10/100 Base)	
	Protocol	TCP/IP, HTTP, DHCP	
	Application	Live, Playback, Setup, Notification (Callback, E-Mail)	
	Web Browse	Internet Explorer 7 or higher	
Storage		3xSATA HDD & 1xSATA ODD (or max. 4 SATA HDD w/o ODD)	
Backup		CD & DVD-RW(Only HDE2424DV and HDS4848DV), External HDD(USB), External USB Memory	
Control		Front Panel Button, USB Mouse, IR Remote Controller, Joystick Controller	
OSD		Graphic User Interface (Multilingual)	
Approval		FCC, CE, KCC	
ROHS		ROHS Compliance	
Power Consumption		DC12V, 6.67A (80W)	
Operating Temperature		5°C ~ 40°C / 41°F~104°F	
Operating Humidity		0%~80% / non-condensing	
Dimension		430(W)x88(H)x428(D)mm / 16.93(W)x3.5(H)x16.85(D)inch	
Weight		6Kg / 13lb (without HDD)	

Chapter 2. System Installation

1. Package Contents

The following components are included in the product:

DVR Unit	
DC Adaptor	
Power Cord	
CD (User's Manual & Network S/W)	
Remote Controller	
Quick Guide	

2. Connecting Devices

2-1. 4 Channel Premium DVR

The rear panel of the 4 channel premium DVR comprises the following:

- **Front USB:** Two USB ports are provided to connect external devices like HDD, ODD, Flash memory for Backup, System upgrade or USB mouse on the front panel. A USB mouse can be connected only front panel USB port dedicated only for mouse.

Video Input

Connect the coaxial cables from the cameras to the BNC video connectors.

Loop-Through Video

Connect the coaxial cables from the Loop BNC connector to another device.

Audio Input

The DVR can record audio up to 4 sources. Connect the audio sources to the Audio-In RCA connectors. All channels need external pre-amplifiers. It is the user's responsibility to determine if local laws and regulations permit recording audio.

Audio Out

The DVR does not have amplified audio output, so you will need a speaker with and amplifier.

Video Output

Connect the main monitor to either the Video Out (CVBS) or VGA out connector. Connect the spot monitors to the SPOT OUT connectors as needed.

ETC

- **RS-232C:** An RS-232C connector is provided to connect an ATM or POS machine for Text-In function. Use a cable with a DB9 (female) connector to connect to the DVR.
- **Network:** Connect a Cat5 cable with an RJ-45 connector to the DVR connector for remote monitoring, remote playback, remote setup. See **Chapter 3-2. DVR Configuration** for configuring the Network connections.
- **Reset:** The DVR has a Reset switch that will only be used to return all the settings to the original factory settings. To reset the unit, turn the DVR off first. Turn it on again while poking the straightened paperclip in the reset hole. Hold the switch until the DVR is initializing.
- **Power Connector:** Connect adapter cable to the power connector on the rear panel. (DC12V, 3.33A) Input AC power to the adapter. (free voltage from 100V to 240V, 50/60Hz)

RS485/ALARM/SENSOR

RS485/ALARM & SENSOR

The RS485 connector can be used to control PTZ cameras. The DVR can also be controlled remotely by a control keyboard.

4 alarm output connectors are provided to connect external alarms such as sirens or lights. 2 alarm output connectors have internal relays and the others are TTL signals.

4 sensor input connectors are provided to connect external devices. You can use sensors to signal the DVR with event. To make connections on the terminal block, press and hold the button and insert the wire in the hole below the button.

2-2. 8/16 Channel Premium DVR

The rear panels of the 6/18 channel premium DVR comprise the following:

[8 Channel Premium Model]

[16 Channel Premium Model]

Video Input

Connect the coaxial cables from the cameras to the BNC video connectors.

Loop-Through Video

Connect the coaxial cables from the Loop BNC connector to another device.

Audio Input

The DVR can record audio up to 16(8) sources. Connect the audio sources to the Audio-In RCA connectors. 1~4 Channel connectors have internal pre-amplifiers for directly connecting microphones and other channels need external pre-amplifiers.

It is the user's responsibility to determine if local laws and regulations permit recording audio.

Video Output

Connect the main monitor to either the Video Out (CVBS) or VGA out connector. Connect the spot monitors to the SPOT1~4 connectors as needed. (Premium model only)

ETC

- **Audio Out:** The DVR does not have amplified audio output, so you will need a speaker with and amplifier.
- **RS-232C:** An RS-232C connector is provided to connect an ATM or POS machine for Text-In function. Use a cable with a DB9 (female) connector to connect to the DVR.
- **Network:** Connect a Cat5 cable with an RJ-45 connector to the DVR connector for remote monitoring, remote playback, remote setup. See **Chapter 3-2. DVR Configuration** for configuring the Network connections.
- **USB:** Four USB ports are provided to connect external devices like HDD, ODD, Flash memory for Backup, System upgrade or USB mouse. Two USB ports is located on the rear panel and the other two are on the front panel. A USB mouse can be connected only front panel USB port dedicated only for mouse.
- **Reset:** The DVR has a Reset switch that will only be used to return all the settings to the original factory settings. To reset the unit, turn the DVR off first. Turn it on again while poking the straightened paperclip in the reset hole. Hold the switch until the DVR is initializing.
- **Power Connector:** Connect adapter cable to the power connector on the rear panel. (DC12V, 6.67A) Input AC power to the adapter. (free voltage from 100V to 240V, 50/60Hz)

Sensor Input

16(8) sensor input connectors are provided to connect external devices. You can use sensors to signal the DVR with event. To make connections on the terminal block, press and hold the button and insert the wire in the hole below the button.

Alarm Output & RS485

16(8) alarm output connectors are provided to connect external alarms such as sirens or lights. 4 alarm output connectors have internal relays (Premium model only) and the others are TTL signals.

The RS485 connector can be used to control PTZ cameras. The DVR can also be controlled remotely by a control keyboard.

- **Front USB:** Two USB ports are provided to connect external devices like HDD, ODD, Flash memory for Backup, System upgrade or USB mouse on the front panel. A USB mouse can be connected only front panel USB port dedicated only for mouse.

Note: This manual covers the 4-channel, 8-channel and 16-channel DVRs. The DVRs are identical except for the number of cameras, audio inputs and alarms. The illustrations and descriptions in this manual refer to the 16 channel model.

3. Cautions

- Avoid installing the product where there are direct rays or it is hot by locating near from heat generator. (May cause fire)
- Do not put vase, flowerpot, cup, cosmetics, drug, and anything the contain water on product. (May cause fire or electric shock, and it may injure people by falling)
- Do not insert or drop any metal object (coin, hair pin) or flammable object (match, paper) into air hole. (May cause fire or electric shock)
- Do not put any heavy object on it. (May injure people by being fell or destroyed.)
- Put power plug surely not to be moved. (If not, this may cause fire.)
- Unplug power plug and antenna when there are thunders and lightening. (May cause fire.)
- For cleaning the product, wipe surface with dry towel. Using chemical agent or cleaner may change the color and unpeel paint.
- Do not put several plugs at same time. (May cause electric shock.) If there is smoke or strange smell, stop operation. In this case, turn the power off and unplug it, and then contact our service center. (If you keep using it, this may cause fire or electric shock.)
- Do not unplug by pulling cord. (If cord is damaged, it may cause fire or electric shock.)
- Do not plug or unplug with wet hands. (May cause electric shock.)
- Keep the power cord untwisted. (May cause fire or electric shock.)
- Use proper adapter. (Using too much electric power may cause fire or electric shock.)
- Do not install it at where exposed to rain and wind and water drop. (May cause fire, electric shock and transformation.)
- Keep away from fire. (May cause fire.)
- Do not disassemble or remodel on your own. (May cause malfunction or electric shock.)
- Do not put next to flammable materials like flammable spray. (May cause fire.)
- Do not install it at a place with too much dirt. (May cause fire.)
- Do not install it on unstable places like shaking table and inclined place or shaking place. (May injure users by falling down or being upside down.)
- Do not put an heavy object on power cord or avoid it from being pressed by the device. (May cause fire or electric shock.)
- In case of using extension cord, do not use several devices at same time. (May cause fire with abnormal heating of extension.)
- When there are dirt on power plug pin or power outlet, clean it nicely. (May cause fire.)
- Do not damage on power cord or plug, and bend or twist or pull too much, and put it between other objects or heat. If power outlet insertion part is not tight, do not use it. (May cause fire or electric shock.)
- Do not drop or give a shock to the product. (May injure people or cause malfunction.)
- Do not touch power adaptor or signal controller. (May cause electric shock.)
- Do not put any object too close to block cooling fan. (May cause fire.)
- In case of exchanging batteries with improper type, there might be danger of explosion.
- For used batteries, throw away separately from other garbage.
- When you take out batteries, avoid children from eating them by mistake. Keep them away from children. (If a child ate them, contact a doctor right away.)

Chapter 3. Using DVR

1. Basic Operation

1-1. Front Panel & IR Remote Controller

The DVR should be correctly installed before proceeding. The location and the shape of the buttons may vary depending on the DVR model. (In 4-channel DVR, Only some of main buttons most commonly used can be found on the front panel.)

Control	Description
USB Port	Two USB ports are located on the front panel. A USB mouse can be connected USB port dedicated only for mouse as picture directed.
Camera Buttons (1~0)	Pressing camera buttons and Enter button will cause the selected camera to display full screen. Buttons are used to enter passwords.
MENU / EXIT Button	Enters the Setup Menu. User will need to enter the authorized password to assess Setup. In Playback mode, MENU button displays the Playback Menu.
DISPLAY Button	Changes the screen display mode in the current screen or playback screen.
SEQUENCE Button	Displays live channels sequentially.
Up, Down, Left, Right Arrow, ENTER Buttons	These are used to change settings for the product in MENU mode or used in PTZ control mode. (pan, tilt)
BACKUP Button	Copies recorded data to an external storage device.
PLAYBACK Button	Changes to the playback mode from the live mode.
⏸ PAUSE Button	Under playback mode, the button can be used to pause the playback screen. - Display menu to save PTZ preset under PTZ mode.
▶ PLAY Button	Plays the video forward. Press the button repeatedly to increase play speed up to max 32 times (1, 2, 4, 8, 16, 32 times) faster. Use this button to move right when setting the menu. - Focus on far distance under PTZ mode.
◀ R.PLAY Button	Plays the video backward. Press the button repeatedly to increase play speed up to max 32 times (1, 2, 4, 8, 16, 32 times) faster. Use this button to move right when setting the menu. - Zoom Out under PTZ mode.
⏩ STEP FORWARD Button	Move forward by one frame under Pause. Use this button to move up when setting the menu. - Focus on near distance under PTZ mode.
◀ STEP BACKWARD Button	Move backward by one frame under Pause. Use this button to

	move down when setting the menu. - Zoom In under PTZ mode.
▲ EJECT Button	It will open or close the backup drive such as CD-RW or DVD - Display menu to load PTZ presets under PTZ mode.
PTZ Button	Changes to the PTZ control mode from the live mode.
ZOOM Button	Zooms the current image on the screen.
PIP Button	Changes to PIP screen mode from live screen.
FREEZE Button	Freeze the current screen.
AUDIO Button	Selects a camera for live & playback audio output.
SPOT Button	Assigns the SPOT output channel.
OSD Button	Turns on/off the OSD display.
LOG Button	Checks the system's log information.
ID Button	Selects the DVR system ID. (Remote controller only)
E.REC Button	Pressing the E.REC button starts Emergency Recording Mode of all camera channels, and displays "!" on the screen. Pressing the button again will stop E.REC mode.
Status LED	Power, HDD, Network, Alarm

1-2. Turning on the System

Connecting the power cord will turn on the power of DVR. It will take approximately 10 to 30 seconds for the system to be initialized. Once the system is initialized, it will display live screen, and begin to record video automatically.

Note: To turn off the system, select SHUTDOWN under main menu (MENU > SHUTDOWN) and unplug the power cord when the shutdown message appears.

Note: When installing the HDD for the first time, the HDD should be formatted first.
"MENU > RECORD > Storage > HDD format"

1-3. Menu Bar

The menu bar will appear on the bottom of the screen as shown below.

	Pressing the Menu will bring up the main menu list.
	Shows the % of HDD being used.
	Turns on when the HDD is set to be overwritten.
	Sequence display mode.
	Turns on when the system is connected to the network.
	Turns on when the Alarm is being activated.
	Mirroring mode
	Archiving Mode
	E.REC (Emergency Recording) Mode.
	Displays date & time.
	IR Remote Controller

1-4. Display Icons

	No Recording
	Recording (Red)
	E.REC (Emergency Recording)
	Event Recording (Red)
	Pre Event Recording (Blue)
	Motion Detection
	Sensor Detection
	Text In
	PTZ Camera
	Instant Backup
	Clip Maker (Blue)
	Backup (Red)
	Video Loss

1-5. User or Admin Login

The diagram shows a login interface within a rectangular frame. At the top left is a label 'Login' next to a small rectangular input field. Below this, the text 'ID :' is followed by a dropdown menu showing 'Admin' and a downward arrow. Underneath, the text 'Password :' is followed by a rectangular input field. At the bottom of the main area are two buttons labeled 'O K' and 'Cancel'. Below the entire main area is a row of ten buttons, each containing a digit from 0 to 9.

Press MENU to enter main menu screen. Login in screen appears to enter ID (Admin or User) and Password. Password can be set up to 8 numbers by the combination of numbers from 0 to 9. The factory default password is '1111' so press "1111" and OK to log in to the system for a first time log in. Password can be set under password set up option (MENU > SYSTEM > User). System will be automatically log out if it is not in-use for some time. This "Auto Logout Time" can be set under password set up option (MENU > SYSTEM > User).

1-6. The Main Menu

The Main Menu of DVR consists of SYSTEM, DEVICE, DISPLAY, RECORD, NETWORK and EVENT. And each menu consists of various sub menus that allow detail set up of the system. Use Mouse, Remote Controller or Front Buttons to access to each menu.

Note: Please make sure the system log out is done when the system setting or operation completed to prevent any unauthorized changes of system settings or operations.

For more information on Contextual Menu please refer to 2. DVR Configuration.

2. DVR Configuration

2-1. SYSTEM

Under SYSTEM menu, System configuration options for general Information, Date & Time, User, Quick Setup and System Log can be selected.

2-1-1. MENU>SYSTEM>Information

In the Information screen, DVR Name, System Version, Upgrade, Mac Address and Configuration options can be selected. Highlight and press DVR Name  to enter or change DVR name. Name the DVR by using the virtual keyboard.

To Upgrade the system, save the upgrade file to USB Flash Memory and connect it to DVR. Once the Device is connected, press Upgrade button to execute system upgrade.

Upgrade will take approximately 5 minutes. DVR will reboot automatically when the upgrade is completed.

Note: DO NOT remove USB Flash Memory or turn off the system during the upgrade. Removing USB Flash Memory or Turning off the system during the upgrade may cause system malfunctioning.

Remote Control ID

Enter Remote Control ID to control multiple DVRs individually. If Remote Control ID remains as 0, Remote ID does not have to be selected when using remote controller. It will work as general ID for any remote controls and a remote control will communicate with any DVRs with ID 0.

Video Type

The system automatically detects camera signal types as NTSC/PAL. But the system also offers manual selection options for different signal types.

Configuration

System settings can be saved and loaded using Configuration option

Export: Save settings to USB Flash Memory

Import: Load saved settings from USB Flash Memory

Default: Load factory default settings

Note: Configuration Import does not affect or changes system and network settings.

Network settings will also not be changed when selecting Default option.

2-1-2. MENU > SYSTEM > Date & Time

SYSTEM: Date & Time

Date & Time NTP Holiday

In Record Tools, estimated HDD usage and recording period can be calculated. Press Calculate once resolutions, ips, number of cameras and quality are set. The recording period is calculated based the size of HDD installed.

The GB size shows the HDD size requires for a day recording. Day and Hours shows the period can be recorded based on the installed HDD size.

Note: The calculation results show approximate data only. Same frame rate and video quality does not guarantee same storage size and recording duration. This is due to the variety of conditions on images such as more/less colors or more/less movements. This situational variance will affect the file sizes more at lower frame rate settings.

Note: Changes Ips manually. It does not change Ips according to the change of resolution.

Note: approximate size for each resolution – CIF: 360X240, Half D1: 720x240, D1: 720x480

In Address, Information such as Type, IP address, Subnet Mask, Gateway Port and DNS can be set for network connections.

Type: Select the type of network configuration from: Static IP, DHCP and ADSL(with PPPoE).

IP Address: Enter IP address using button.

Subnet Mask: Enter Subnet Mask using  button.

Gateway: Enter Gateway using  button.

DNS: Set up the IP address of the DNS server. If you set up the DNS Server, the domain name of the DVRNS server instead of the IP address can be used during the DVRNS Server setup.

In Port, Select appropriate port number for external access to the system. The port list shows necessary ports to be opened for each operations.

Network Port: Set port for DVR Remote Client.

Web Port: Set port for Web Remote Client.

RTSP Port: Set port for Android based devices.

iPhone Port: Set port for iPhone.

Note: ISP's(Internet Service Provider) DNS address should be inputted for using DDNS.

Note: Default Network port is 10101 but it can be set from 1500 to 32000 if it is necessary
After you modify port numbers, DVR will be automatically restarted.

Note: Router or similar devices users need to open additional TCP ports for network connection, such as Live, Playback, Setup, Web, RTST, and iPhone.

2-5-2. MENU > NETWORK > DDNS

The screenshot shows a web interface window titled "NETWORK : DDNS". Inside the window, there are two checked checkboxes: "Use DDNS" and "Use ID". Below "Use DDNS", there is a "DDNS Server" dropdown menu showing "Autoipset.com" and a "Hostname" text input field. Below "Use ID", there is an "ID" text input field and a "Password" text input field showing asterisks. There is an "Update" button below the password field. At the bottom of the window are "O K" and "Cancel" buttons. Below the window, there is a status bar with a "MENU" button, a progress indicator at "0%", a refresh icon, a help icon, a search icon, and a timestamp "2009-04-06 09:29:17 AM".

Dynamic DNS (DDNS) allows you to create a hostname that points to your dynamic IP or static IP address. We also provide an update mechanism which makes the hostname work with your dynamic IP address of DVR

In the **DDNS**, network options for DDNS can be selected.

Use DDNS : To decide whether using DDNS service or not

Hostname: Create a hostname that points to your dynamic IP or static IP address.

Use ID: To decide whether managing hostname through autoipset.com or not.

ID/Password: autoipset.com's ID and Password.

Note: Use ID/Password registered in DDNS.

Update: Register or update the hostname at autoipset.com

Note: For more specific information about DDNS and its registration and management at autoipset.com, please see the appendix.

2-5-3. MENU > NETWORK > Notification

MENU < << >> > PAUSE 2009-03-01 08:54:18 AM	

Text In Search provides easy search by transactions. Search for Time and Transaction information. Press Search for detail information.

Text In Model: Select a model type for Text In

From: Set beginning time to start search or select First for search from the first data.

To: Set end time to end search or select Last for search to the last data.

Search Text: Enter any words to search text data include the words.

Once entering all the search information, press OK to start Text In search.

3-5. Backup Data Playback

Backup files on backup media can be played on DVR. Insert media with backup files and select a file to playback it on DVR.

3-6. Playback Control

R.Play: Reverse Playback

Step Backward: Go to the previous image

Pause: Freeze or Stop current image

Step Forward: Go to the next image

Play: Play the data at normal speed

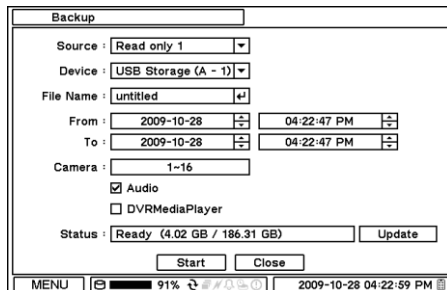

To control the backward and forward playback speed, press on ◀ or ▶ repeatedly. Playback speed can increase up to x32.

4. Backup

Recorded data can be backed up on USB Flash memory. Select backup or Clip Copy option during Search or Live mode by selecting Backup.

4-1. Backup

In the BACKUP, the recorded data can be selected for backup to USB devices.

Press USB Device ☒ to select the type of USB Device connected to the system.

Select date & time period of data to be backup using button.

Select Camera number to be backup or All to backup all the data recorded during the selected period.

To back up recorded Audio with video data together select Audio.

Status shows capacity of the device being prepared for backup, and it will show backup progress during backup.

The files saved (backup) in DVDMediaPlayer (.exe) format allows multi camera backup and the files would not require any specific codec for playback on PC. To open and play a file saved in DVDMediaPlayer (.exe), double click the file and it will automatically be played on Internet Explorer window. This function is supported only on Internet Explorer 7.0 or above.

Note: The backup process could be slowdown if the system is being monitored/playback on the remote using the client program during the backup process.

Note: *"DO NOT remove the back up media while the data backup is being processed. It may cause critical damage to either the media or system if the backup media is removed during the backup process."*

4-2. Instant Backup

Press backup button to start Instant Backup during the playback. Instant Backup window will appear when press backup button during the normal playback mode. Select Device, File Name, Audio and press Start to continue the playback and backup. The Backup Icon will appear on the screen during the Instant Playback. Press backup button one more time to stop and complete Instant Backup.

Note: *"DO NOT remove the back up media while the data backup is being processed. It may cause critical damage to either the media or system if the backup media is removed during the backup process."*

Note: Playback speed will be slower than usual while instant back up is processing.

4-3. Clip Maker

Clip Maker allows to create single channel backup file which can be played on PC. Select Clip Maker option on the pop up menu during the live or pause mode on the playback.

Select the backup option for Clip Maker. Press **Start** button to create Clip Maker. Use Quick Time player to play the file created using Clip Maker

Note: The Clip Maker file can not be played on other programs such as Window Media Player.

Chapter 4. Network Monitoring

5. Web Viewer

User can access to use DVR's Setup, Live Web Monitoring, Playback functions through Internet Explorer.

5-1. Login

User can access to the DVR's Remote Monitoring System if user inputs DVR's IP address or its registered hostname at Internet Explorer's address bar.

Ex) Web port is 80(Default value) – <http://hostname.autoipset.com> or 211.104.176.143

Ex) Web port is not the default value – <http://hostname.autoipset.com:Web port> or

211.104.176.143:Web port Ex) <http://hostname.autoipset.com:8080> or 211.104.176.143:8080

Port numbers can be checked at DVR MENU > Network > Address > Port

At the DVR's login page, User should input correct ID, Password, and Port Number in order to use Live or Playback function.

- **ID** : DVR's Administrator ID or User ID (Default ID: admin or user)
- **Password** : DVR's Password for administrator or user (Default Password : "1111")
- **Port Number** : DVR's Port Number (Default Value : 10101)

*If you need more information about Port Number, please check the following manual section. - "3-5-1. MENU > Network > Address > Port "

- **Live** : Live Web Monitoring
- **Playback** : Search and Play the DVR's recorded data

5-2. Live

Users can access the Live Web Monitoring and DVR's configuration

-  : One Channel View Mode.
-  : Change the display channel at One Channel View Mode.
-  : Quad View Mode.
-  : Full screen View Mode.
- **Setup:** Changed the DVR configuration.(Only for administrator)

5-3. Playback

User can search and play the DVR's recorded data.

● Playback Icon

- | | |
|--|--|
|  : Backward High-Speed Play(X2, 4, 8, 16, 32) |  : Backward Play |
|  : Forward High-Speed Play(X2, 4, 8, 16, 32) |  : Forward Play |
|  : Jump to the beginning of data at the selected date |  : Backward Play by one frame |
|  : Jump to the end of data at the selected date |  : Forward Play by one frame |
|  : Pause | |

5-3-1. Calendar Search

User can select a specific time to search for the recorded data at the calendar.

As you see the picture, date marked as red color if there is recorded data on the calendar. In addition, selected date marked as yellow color.

: Change month / year

: Search data by inputting specific time.

: Refresh the DVR's recorded data information.

5-3-2. EVENT Search

User can search recorded events data through the Event Search function.

Event Search window will be come up if user clicks the Event Search button, then user should select the date and click ok button. Now, you can select any event that you want to check on the Event list.

: Change the Event List pages

: Event Search again with different date

Note: Web viewer may not display videos properly if user use low performance video cards, especially on-board type.

APPENDIX

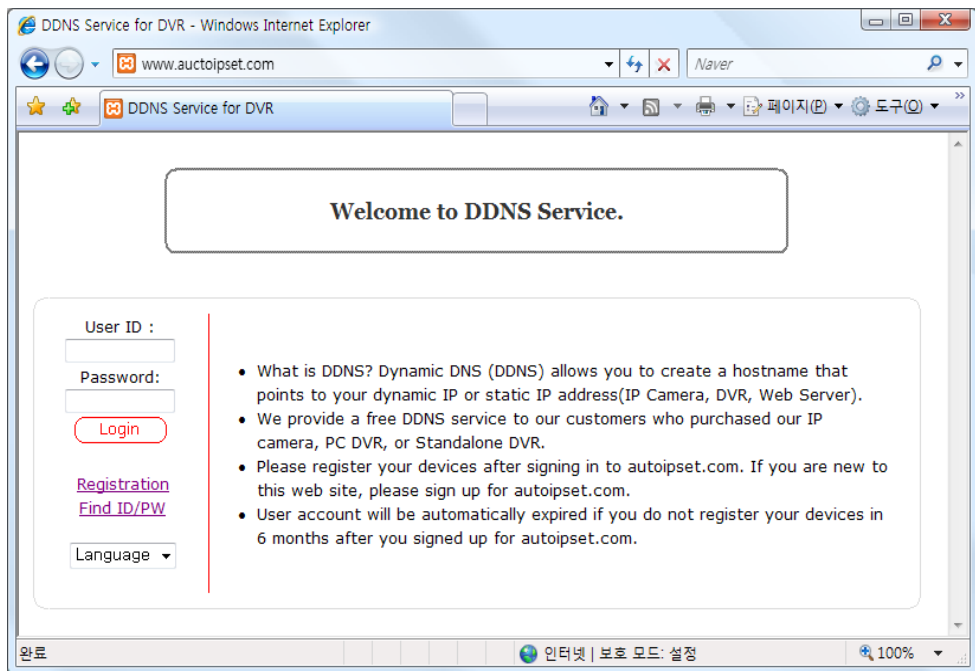

A-1. DDNS(Dynamic Domain Name Server)

Dynamic DNS (DDNS) allows you to create a hostname that points to your dynamic IP or static IP address (IP Camera, DVR, and Web Server). We also provide an update mechanism which makes the hostname work with your dynamic IP address of DVR. You can use DDNS service after signing up for autoipset.com or without signing up process.

A-1-1. Use DDNS service after signing up for autoipset.com

1. Sign up for autoipset.com

Please run Internet Explorer program, and then please type <http://www.autoipset.com> at Internet Explorer's address bar. You will see the web page for DDNS service like below.

Please click "Registration" in order to sign up for autoipset.com.

User ID : [Check ID]
(Up to 20 characters)

Password : Confirm :
(Up to 20 characters)

Name :
(Up to 20 characters)

E-mail :
(Please input an E-mail address that you want to get your password info when you forgot your password.)

Submit

Please fill up the blank with correct information, and then click submit button. You should check the duplication of your user ID by clicking "Check ID" before submission.

2. Log in

Please log in with your ID and Password.

After you log in, you can see the list of your registered DVR like below at the product list.

The screenshot shows a web browser window titled "DDNS Service for DVR - Windows Internet Explorer". The address bar shows "www.autoipset.com/user/list.php". The page content includes a "User List" section with a table of registered DVRs. On the left, there are buttons for "Product List", "Edit User Info", and "Log out". Below the table, there are instructions and a legend for connection status.

Hostname	Public IP	Status
dvr1.autoipset.com:80	211.104.176.100:80	●
dvr2.autoipset.com:80	211.104.176.101:80	●

[delete]

※ If you click your hostname, it will directly open your IP Camera, DVR, or Web Server page.
 ※ If you want to delete your registered hostname, please click [Delete] key after selecting the hostname.

The last connection time with DDNS	
●	In 5 minutes
▲	Between 5 and 20 minutes
●	More than 20 minutes
×	Naver connected to DDNS

3. DDNS registration

Please select DDNS menu at your DVR with the following route.

DVR > MENU > NETWORK > DDNS

First, please input a hostname that you want to use, and then please select the check box for Use ID. Next, please input ID and Password that you registered at autoipset.com, and then please click "Update" button. Finally, if you see the message, "DDNS: Succeeded in updating", then all the registration process is done.

4. DDNS Management

Status	Specification
	Elapsed time since last update is Less than 5 minutes
	Elapsed time since last update is more than 5 minutes and less than 20 minutes
	Elapsed time since last update is more than 20 minutes
	No update history

5. Delete the registered DDNS

	Hostname	Public IP	Status
	dvr1.autoipset.com:80	211.104.176.100:80	
	dvr2.autoipset.com:80	211.104.176.101:80	

[delete]

Please select the DVR DDNS that you want to delete, and then click "Delete" button.

A-1-2. Use DDNS without signing up for autoipset.com

Please select DDNS menu at your DVR with the following route.

DVR > MENU > NETWORK > DDNS

The screenshot shows a web-based configuration interface for a DVR. The title bar at the top reads "NETWORK : DDNS". The main content area has a dark background. At the top, there is a checkbox labeled "Use DDNS" which is checked. Below this, there are two input fields: "DDNS Server" with a dropdown menu showing "autoipset.com", and "Hostname" with a text box containing "DVR". Below these, there is another checkbox labeled "Use ID" which is unchecked. Underneath, there are two more input fields: "ID" and "Password", both with empty text boxes. At the bottom of the form, there are three buttons: "Update", "O K", and "Cancel".

Please input a hostname that you want to use, and then please click "Update" button. If you see the message, "DDNS: Succeeded in updating", then all the registration process is done.

COMPLIANCE NOTICE OF FCC:

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

WARNING: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT. THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE-CAUSING EQUIPMENT REGULATIONS.

WEEE (Waste Electrical & Electronic Equipment)

Correct Disposal of This Product (Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
